

Specialists in Infrastructure & Building Construction

Hafeera Contracting

Company Profile

Over 35 years of commitment

Introduction

Hafeera Contracting Company (HCC) was formed in 1983 when the Chairman's father Mohammed Abdul Rahim restructured his founding company 'MARK'.

HCC has since continued the legacy of Mohamed Abdul Rahim and has developed and consolidated many long-term business relationships throughout the Kingdom, maintaining a reputation for quality and value for money.

HCC is now an established business in the Kingdom having interests in Contracting, Engineering, Manufacturing and Trading with active operations in Civil Engineering, Infrastructure and Building Works projects.

HCC are underpinned by a professional management team, strong work ethic, and a constant desire to improve. It is these basic attributes that have enabled HCC to adapt and maintain its strong position in an evolving local market.

'It is my continued commitment to provide a competitive pricing structure for our valued Clients whilst not compromising on quality or performance'

Company Policy

Areas of Operation

Plant and Machinery

Quality Standards & Safety

- **General Contracting**
- **Design and Build**
- **Construction & Production Management**
- **Plant & Machinery Management**
- **Plastic Pipe Manufacturing**

HCC's Policy on plant operation is one of preventive maintenance to avoid involving major overhauls.

HCC has a high degree of equipment standardization that has been found to be the most suitable for our operations, considering past performance and local back-up services.

All aspects of plant requirements are planned including workshop and maintenance facilities, stores, parts and services, maintenance personnel including programmes and procedures.

Thus, equipment performance and availability are closely monitored by the management office with frequent site visits by experts and give support whenever necessary.

HCC understands the importance that our Clients place in providing a quality product delivered in a safe environment.

QUALITY CONTROL

We have developed a Management System which incorporate Quality, Health, Safety and Environment based on international standards in accordance to ISO 9001: 2015. We are continuously striving to create and introduce improvements to that system.

Construction and Production Management was carefully outlined as this is a critical element of successful construction management in control of labour and materials.

Each project has a specific Quality Plan developed in order that the a quality control program is in place to ensure compliance with the particular construction specifications and drawings for all the associated activities of the project.

HEALTH AND SAFETY

HCC has developed a robust policy that encompasses all its activities and additionally prepares individual project with specific health and safety plans that ensure all potential hazards are identified and actions taken to minimize these risks.
